

THREAD

1SW101

INFORMATION

Thread is a reliable and durable foot loop designed for professionals working in vertical environments. Crafted from high-strength nylon fiber, it offers excellent wear resistance and load support in demanding conditions.

Its adjustable buckle allows quick length changes, ensuring the foot remains secure during climbs. Ideal for use with hand ascenders, this tool enhances efficiency during ascent.

Designed for high-altitude operations, it supports, technical rescue, mountaineering, and rock climbing—making it a trusted addition to any rope access or climbing kit.
